JUNE 2026

CROP COVERS

IN THIS MONTH'S NEWSLETTER:

1 AGRO-MARINA CROP COVER

2 GreenTech 2026 – Visit our stand in RAI Amsterdam

1 AGRO-MARINA™ 21G CROP COVER

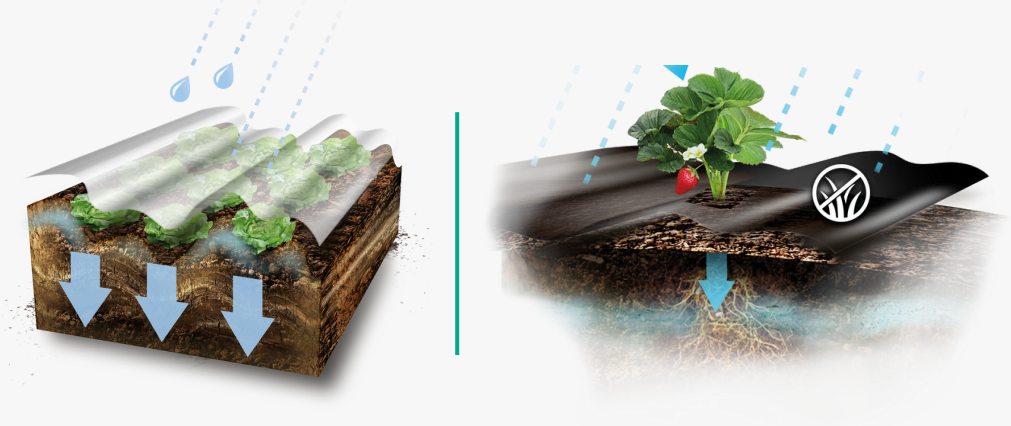

The access of water to plants is very important, especially during the early growth of the vegetables. Agro-Marina™ 21g crop cover permits the water immediately after application and doesn't hinder the growth of the young plants. After heavy rainfall, the cover doesn't crush the plants. Agro Marina™ 21g crop cover makes the plants stronger and healthier and provides the right protection from the very beginning.

WHAT MAKES AGRO-MARINA™ 21G SO SPECIAL?

- permits the water immediately after application
- doesn't crush the plants after rainfall
- enhances the growth of the vegetables
- light blue colour provides the optimal temperature and vegetation condition as it reflects less sunlight compared to white material

The product is available to professionals and hobbyists as well.

Weeds prevention boosted with the bestselling AGRO MARINA™ technology. Guarantees immediate water penetration.

Protection Against Unexpected Frosts

Agro Marina™ crop cover provides excellent protection against unexpected frosts. Its effectiveness is further enhanced by water accumulating in the pores of the fabric. As the water freezes, it creates a protective layer that shields plants from temperature drops by retaining warm air beneath the fabric and preventing cold air from penetrating underneath. This phenomenon is commonly referred to as the "igloo effect".

Crop cover with AGRO MARINA 21gsm

Width	Lenght
3,20 m	100/250/500 m
6,35 m	100/250/500 m
9,50 m	100/250/500 m
12,65 m	100/250/500 m
15,80 m	100/250/500 m
18,95 m	100/250/500 m
22,10 m	100/250/500 m
25,25 m	100/250/500 m

WITH AGRO-MARINA™ TECHNOLOGY

AN INNOVATIVE SOLUTION WHICH TRANSMITS THE WATER IMMEDIATELY AFTER APPLICATION

Agrimpex PRO® rolls can be folded in half (to 1,60m roll width) for cheaper and easier transportation and storage.

All Agrimpex PRO® joined rolls (above 3,20m) have 35cm reinforced edge as a standard, giving you an extra strength on the edge.
